SUBJECT INDEX

Attention, 107, 213, 230, 237, 266
  and coloured stimuli, 213
  and orienting, 213
  divided, 213, 242
  focused, 213, 238
  spatial, 213, 226
Biofeedback, 1
  and blood volume pulse, 1
  and digital pulse amplitude, 1
  and temporalis pulse amplitude, 1
Event-related potentials, 107, 125, 213, 231, 247
  and channel probability, 107
  and motor responses, 125, 131
  and orienting, 247
  and probe stimuli, 247
  and processing negativity, 107, 112, 116
  and steady state rhythm, 247, 250, 255, 260, 267
  and stimulus probability, 125
  in young and old adults, 125, 141
  N1, 111, 213, 222, 226, 260, 262
  N2, 125, 132, 213, 222, 226
  N2b, 213
  O wave, 260, 262, 263
  P1, 226, 232
  P2, 111, 125, 132, 213, 222, 260
  P3, 125, 132
Eyeblink reflex, 291
  and habituation, 293
  and sensitization, 293
  components of, 293
  measurement of, 291, 294, 295, 296
Habituation, 181
  context-specificity of, 181, 186
  of electrodermal responses, 181, 186
Hemispheric functions, 11
  and affect, 11
  and cognition, 11
  and EEG activity, 11
  and electrodermal activity, 11
  and parietal processing, 11
  in left-handed subjects, 11
Orienting, 248
  and attention, 248
  and heart rate, 253, 264
  and sensory facilitation, 248
  and steady state rhythm, 247, 255, 260
Parkinson's disease, 149
  and cognitive deficits, 152
  and information processing, 149, 168
  and neuropsychological deficits, 149
  methodological issues, 150
Pavlovian conditioning, 39
  and electrodermal responses, 39, 49
  and olfactory CSs, 39, 45
  and respiration, 56
  awareness of CS-UCS contingency, 39, 47
Sleep, 27
  and information processing, 27
  mental sleep experience, 27
  NREM sleep, 27, 30, 33
  REM sleep, 27, 30, 33
Smoking, 273
  and blood pressure, 273, 280
  and cardiovascular reactivity, 273, 280
  and mood, 273, 283
  and epinephrine, 273, 280, 283
  and norepinephrine, 273, 280, 283
  heavy versus light, 273

Elsevier Science Publishers B.V. (North-Holland)
